Tier 1 -System Integrators (6)

Altametris SI ↔ SNCF Réseau (subsidiary)

Tier 1 · 2 sources

Subject: What happens after BVLOS approval?

Hi Pascal,

I came across the article about Altametris receiving France's first BVLOS authorization for DJI Dock, a significant milestone for autonomous railway inspection. That was about a year ago now, and I'm curious how things have progressed since then as you scale across more SNCF corridors.

The natural next challenge after BVLOS approval is managing dozens of Dock stations across a distributed rail network: mission scheduling, fleet monitoring, compliance reporting from one place.

CSX Transportation in the US uses FlytBase to inspect rail infrastructure with docked drones, detecting defects down to 1/8 inch. Statnett in Norway deployed our platform for fully remote powerline inspection via drone-in-a-box. The pattern we see globally: BVLOS approval first, fleet management software second.

I'd love to share how other operators in your space are integrating fleet management with DJI Dock. What day works best for a quick conversation?

Best regards,

Dronavia SI

Tier 1 · 2 sources

Subject: Kronos + Dock 3 -what's the software stack?

PRIMARY CONTACT

Name	**Ludovic Pelletey**

Hi Ludovic,

I noticed your Kronos integration with DJI Dock, particularly the new Dock 3 product line. It's a compelling hardware combination, and I imagine demand is growing as more operators adopt drone-in-a-box systems.

When your clients run multiple Kronos-equipped Docks across sites, fleet-wide mission scheduling and centralized monitoring become the next operational challenge.

Sensorem in Australia deployed 20+ FlytBase-powered dock systems and logged 11,000 autonomous BVLOS flights across remote industrial sites. Our platform supports 20+ hardware configurations including all DJI Dock models, designed to be hardware-agnostic from day one.

I can share a relevant case study and walk you through how this works in practice. Would any day this week or next work for a brief call?

Your BVLOS pioneering work with Flying eye is impressive - FlytBase enables fleet-scale autonomous operations

PHOTOM SERVICES (Photosol group) BUYER ↔ SkyVisor (shared evidence)

Tier 2 · 1 sources

Subject: Scaling solar inspections with Dock 3

Hi Clemence,

I've been looking at Photosol's solar farm inspection operations with DJI Dock 3 via SkyVisor. As your portfolio grows and you deploy across more sites, coordinating autonomous inspection missions consistently becomes the operational bottleneck.

Dock	DJI Dock 3

EnBW uses FlytBase to run 2-4x more solar PV inspections at the same annual budget, scaling from 150 MW to 1 GW. The platform automates mission scheduling across every site and delivers consistent inspection data. That's the layer between the Dock hardware and your operational reporting.

We've helped operators in your vertical solve exactly this -I can share specifics. What time works best for a brief conversation?

Best regards,

DERIVED HOOK

Your solar farm inspections with DJI Dock 3 via SkyVisor -as you scale across sites, FlytBase provides centralized fleet management for autonomous inspection operations.

Tier 2 -Authorized Dealers (2)

HP Drones DEALER

Tier 2 · 1 sources

Subject: What your Dock 3 buyers ask after unboxing

Hi Hanniel,

I saw HP Drones' Dock 3 page -"get ready for innovation" is a great positioning. The first thing buyers need after unboxing is fleet management software to run autonomous missions at scale.

Discovery Land Company runs autonomous security patrols through FlytBase. Shell has logged 30,000+ flights. We power 146 solution providers who bundle our platform with DJI Dock hardware. It gives your customers a complete solution and gives you recurring revenue.

I'd love to share how other operators in your space are integrating fleet management with DJI Dock. What day works best for a quick conversation?

drone solution out of the box.

studioSPORT DEALER

Tier 2 · 3 sources

Subject: Your Dock attach rate

Hi Johan,

I noticed studioSPORT carries the full DJI Dock lineup -1, 2, and 3. When customers buy the hardware, the natural next question is fleet management software to actually run autonomous operations at scale.

We work with 146 solution providers globally who bundle FlytBase with DJI Dock. It increases deal value and creates a recurring revenue stream. Sensorem in Australia deployed 20+ FlytBase-powered dock systems and logged 11,000 autonomous BVLOS flights. The platform supports all DJI Dock models out of the box.

I can share a relevant case study and walk you through how this works in practice. Would any day this week or next work for a brief call?

Best regards,

DroneNerds DEALER

Tier 2 · 1 source · US-based, sells globally

Subject: Enterprise Dock 3 docking stations + fleet software

Hi Jeremy,

I noticed DroneNerds has a dedicated enterprise page for DJI Dock 3 docking stations. As your enterprise clients deploy Dock for autonomous operations, the natural next question is fleet management software to coordinate missions across sites.

We work with 146 solution providers globally who bundle FlytBase with DJI Dock. Sensorem in Australia deployed 20+ dock systems and logged 11,000 autonomous flights through our platform. It turns a hardware sale into a complete solution and creates recurring software revenue.

I'd love to share how other enterprise dealers are packaging this. Would any day this week or next work for a brief call?

Best regards,

Drone Parts Center DEALER

Tier 2 · 1 source · EU dealer

Subject: DJI Dock 3 + fleet management software bundle

Hello,

I noticed Drone Parts Center carries the DJI Dock 3 as a stand-alone docking station for professional drones. As your customers deploy Dock for autonomous operations, they will need fleet management software to coordinate missions.

We work with 146 solution providers globally who bundle FlytBase with DJI Dock. Discovery Land Company runs autonomous security patrols through our platform. Shell has logged 30,000+ flights. Bundling FlytBase gives your customers a complete solution.

I can share a short overview of how our dealer partners are packaging this. Would any day this week or next work for a brief conversation?

TakeOff Formation TRAINING

Tier 2 · 1 source · FR training provider

Subject: What your Dock 2 trainees need after certification

Hello,

I came across your recent training day with DJI Matrice 4E, Matrice 4T, and DJI Dock 2. It is great to see training providers preparing pilots for autonomous Dock operations.

Once your students are certified, they will need fleet management software to operate Dock systems in production. FlytBase is the platform that picks up where training ends. We are used by operators in 15+ countries, and our BVLOS compliance programme helped MSS Security achieve Australia's first airport BVLOS approval.

I'd love to share how training providers are connecting their graduates to operational tools. Would any day this week or next work for a quick call?

Best regards,

Flying Hub SI

Tier 2 · 1 source · FR · No LinkedIn

Subject: DJI Dock 2 fleet management for your operations

PRIMARY CONTACT

Name	**General contact**
Email	info@flyingeye.fr

Hello,

I came across Flying Hub and your work with DJI Dock 2 for drone operations in France. As drone-in-a-box deployments grow, fleet management software becomes essential for coordinating autonomous missions across sites.

FlytBase powers 146 solution providers globally. Sensorem deployed 20+ dock systems across Australia with 11,000 autonomous flights. The platform supports all DJI Dock models out of the box.

I would be happy to share how operators in your space are using fleet management with DJI Dock. Would any day this week or next work for a brief call?
